

**JOBOWL**

This project was designed for designers to find aimed jobs, through a series of researches, I developed an app which aims to simplify the process of creating resumes to help my users to find jobs easier.

The user interface of LinkedIn

User age ratio of LinkedIn

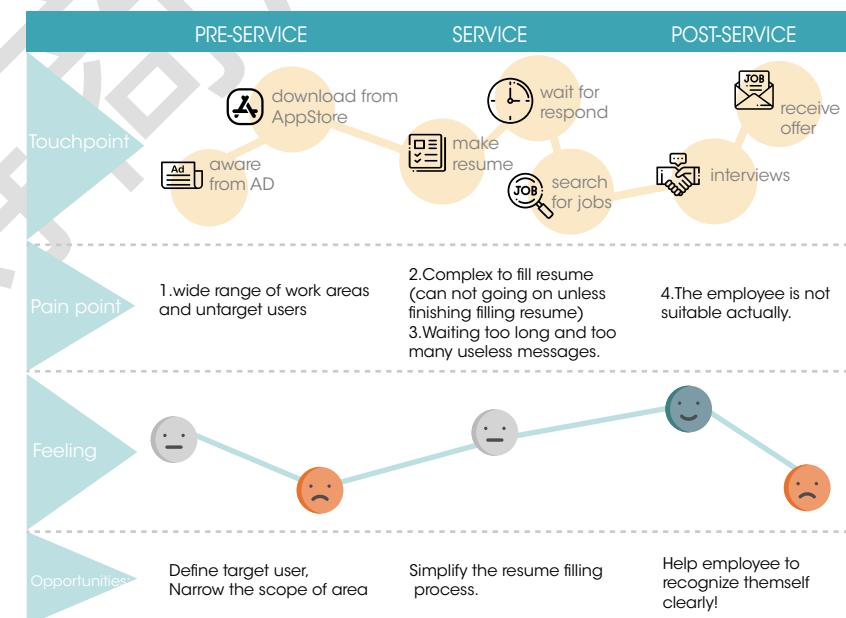

The Information architecture of LinkedIn

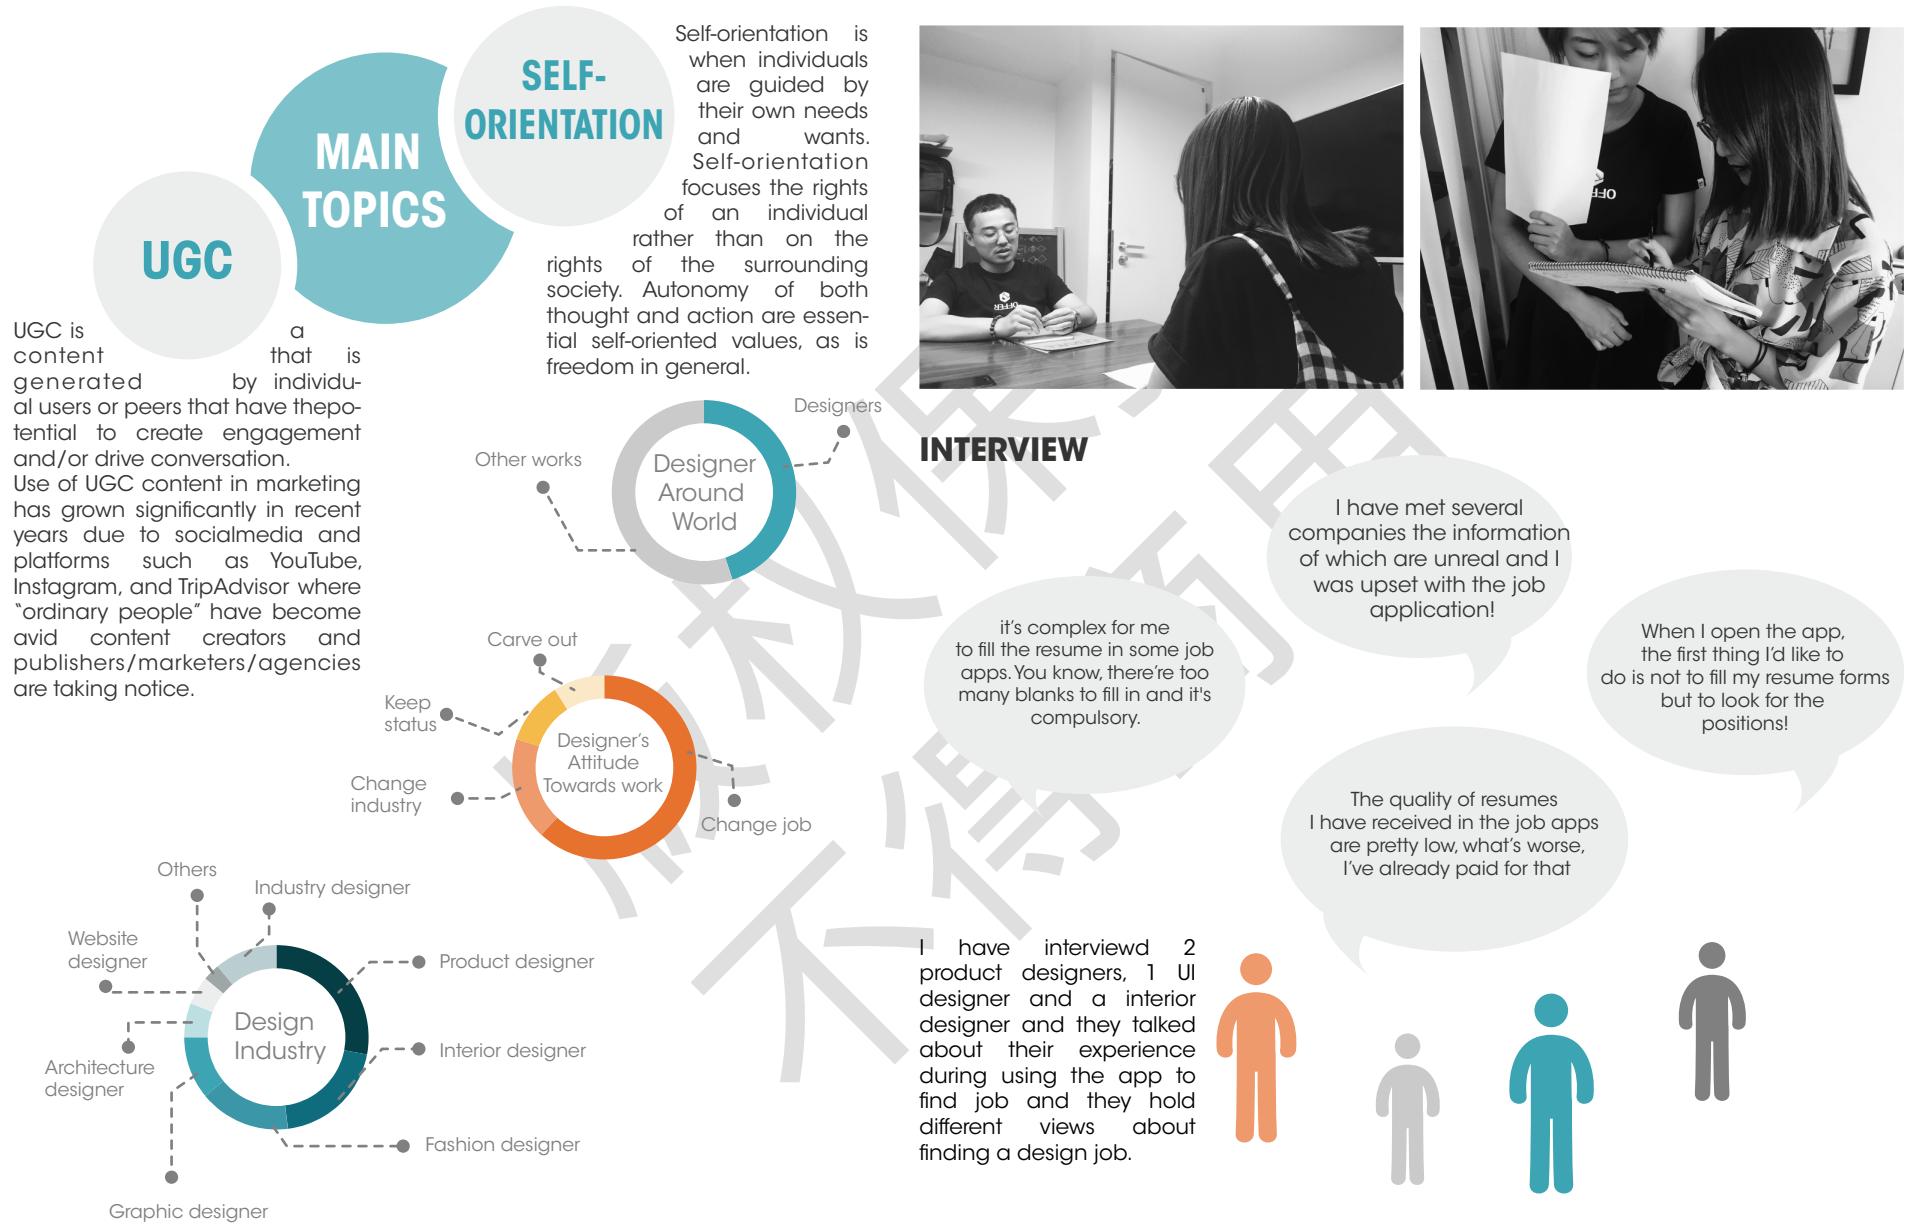

The user interface of BOSS

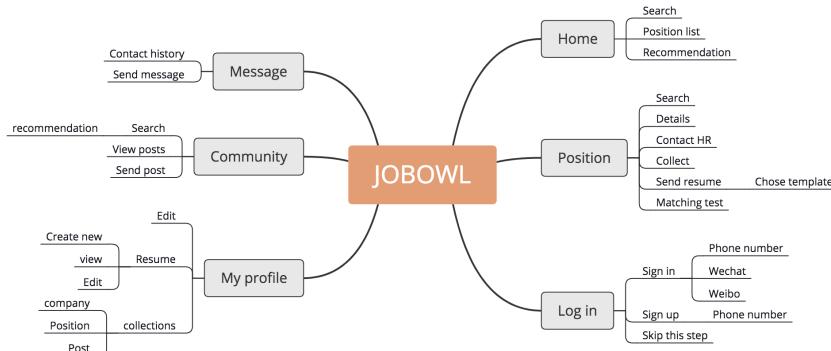

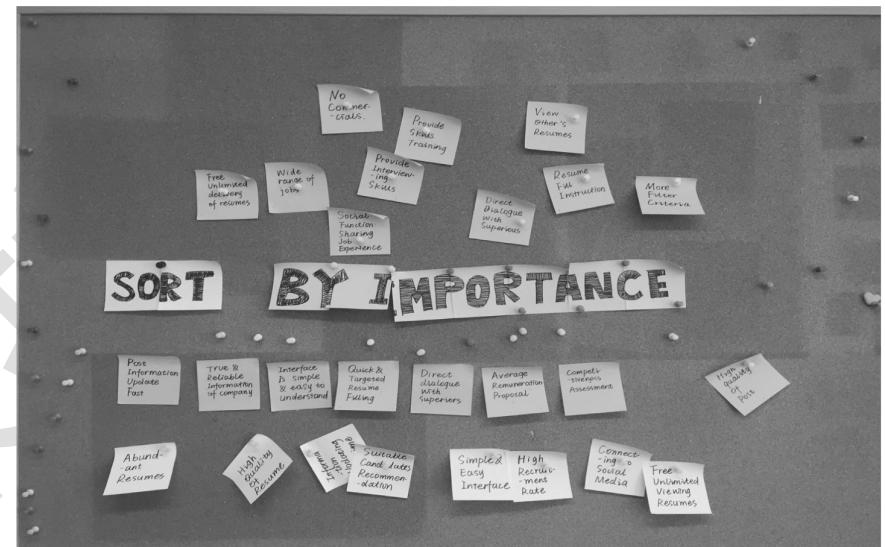

User Journey Map Of BOSS

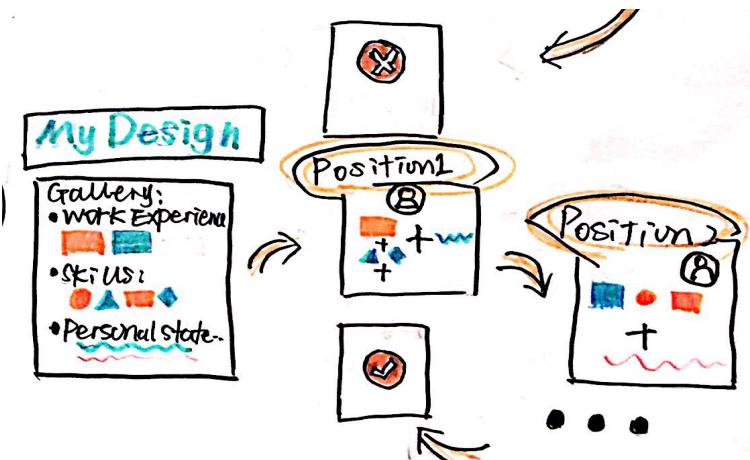

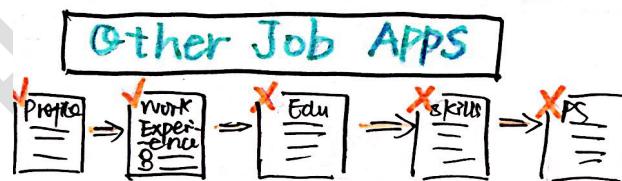

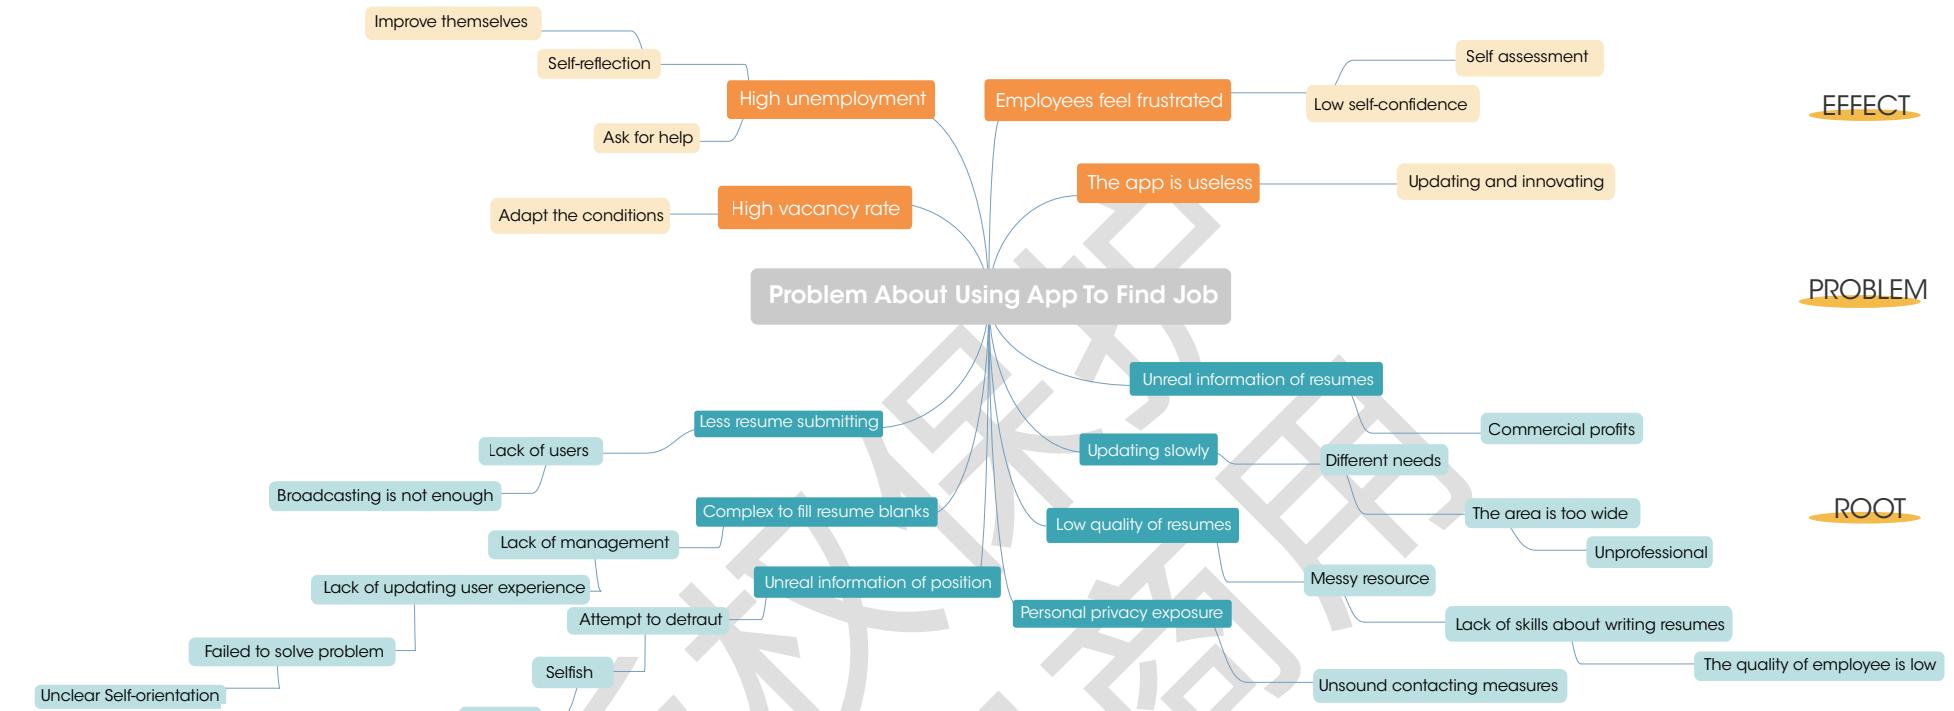

I collected some key words about the factors of job apps and asked different people to select their factors and sort them by importance. They are designers from different places and industries. The results vary from person to person and I drew a conclusion: There are 5 factors chosen by everyone and sorted prior.

Charles  
Male 24  
Productor designer  
Hate trouble

### GOALS

Simplify the process of resume filling

### NEEDS

An easy way to fill resume  
An effective way to contact with recruiter  
An probable way to test my qualification  
Suggestions form others

Charles opening the mobile phone to check whether his resume was glanced by recruiters has become Charles's routine. He wrote his resume carefully and specific, it took him 1 hour to finish, which almost equals to the time he spent in exercising. Day after day, he has been out of work for a long time, he began to doubt himself: Am I not good? Is there any better way I could find a job?

### GOALS

Easy to finvd her ideal employee

### NEEDS

Abundant high quality people looking for jobs

Milandar unlocked her mobilephone and scan the app to check whether her ideal employee appeared. Frustratedly, there comes nothing. The resumes showed on the screen are too messy with low quality, which made her upset and annoyed. She wanted to know where she could find an easy and relaxing way to scan the resume and catch the ideal people soon!

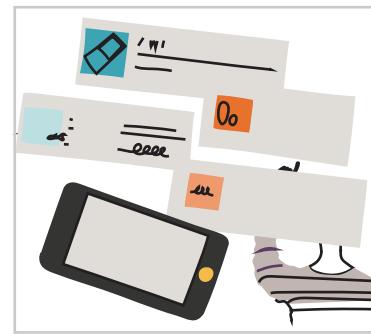

Milandar  
Female 47  
HR administrator  
Careful

1. Charles stayed at home and did nothing but playing video games all day!

2. One day, he was attracted by an Ads posted on the street wall and he decided to find a suitable job!

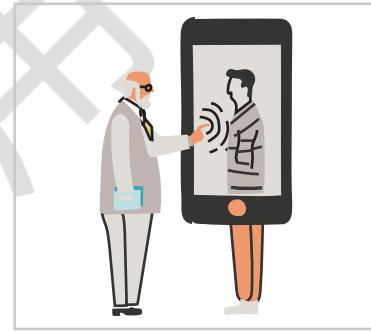

3. He downloaded the App from App store and began to search jobs from it!

4. Curiously, he filled his resume module and it made him feel interested!

5. He also found the community sharing job experience helpful!

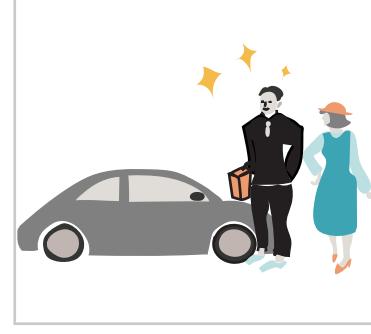

6. Charles found he could contact with superior directly by using the App.

7. Finally after a self testing, he chose the most suitable job and successfully passed the interview!

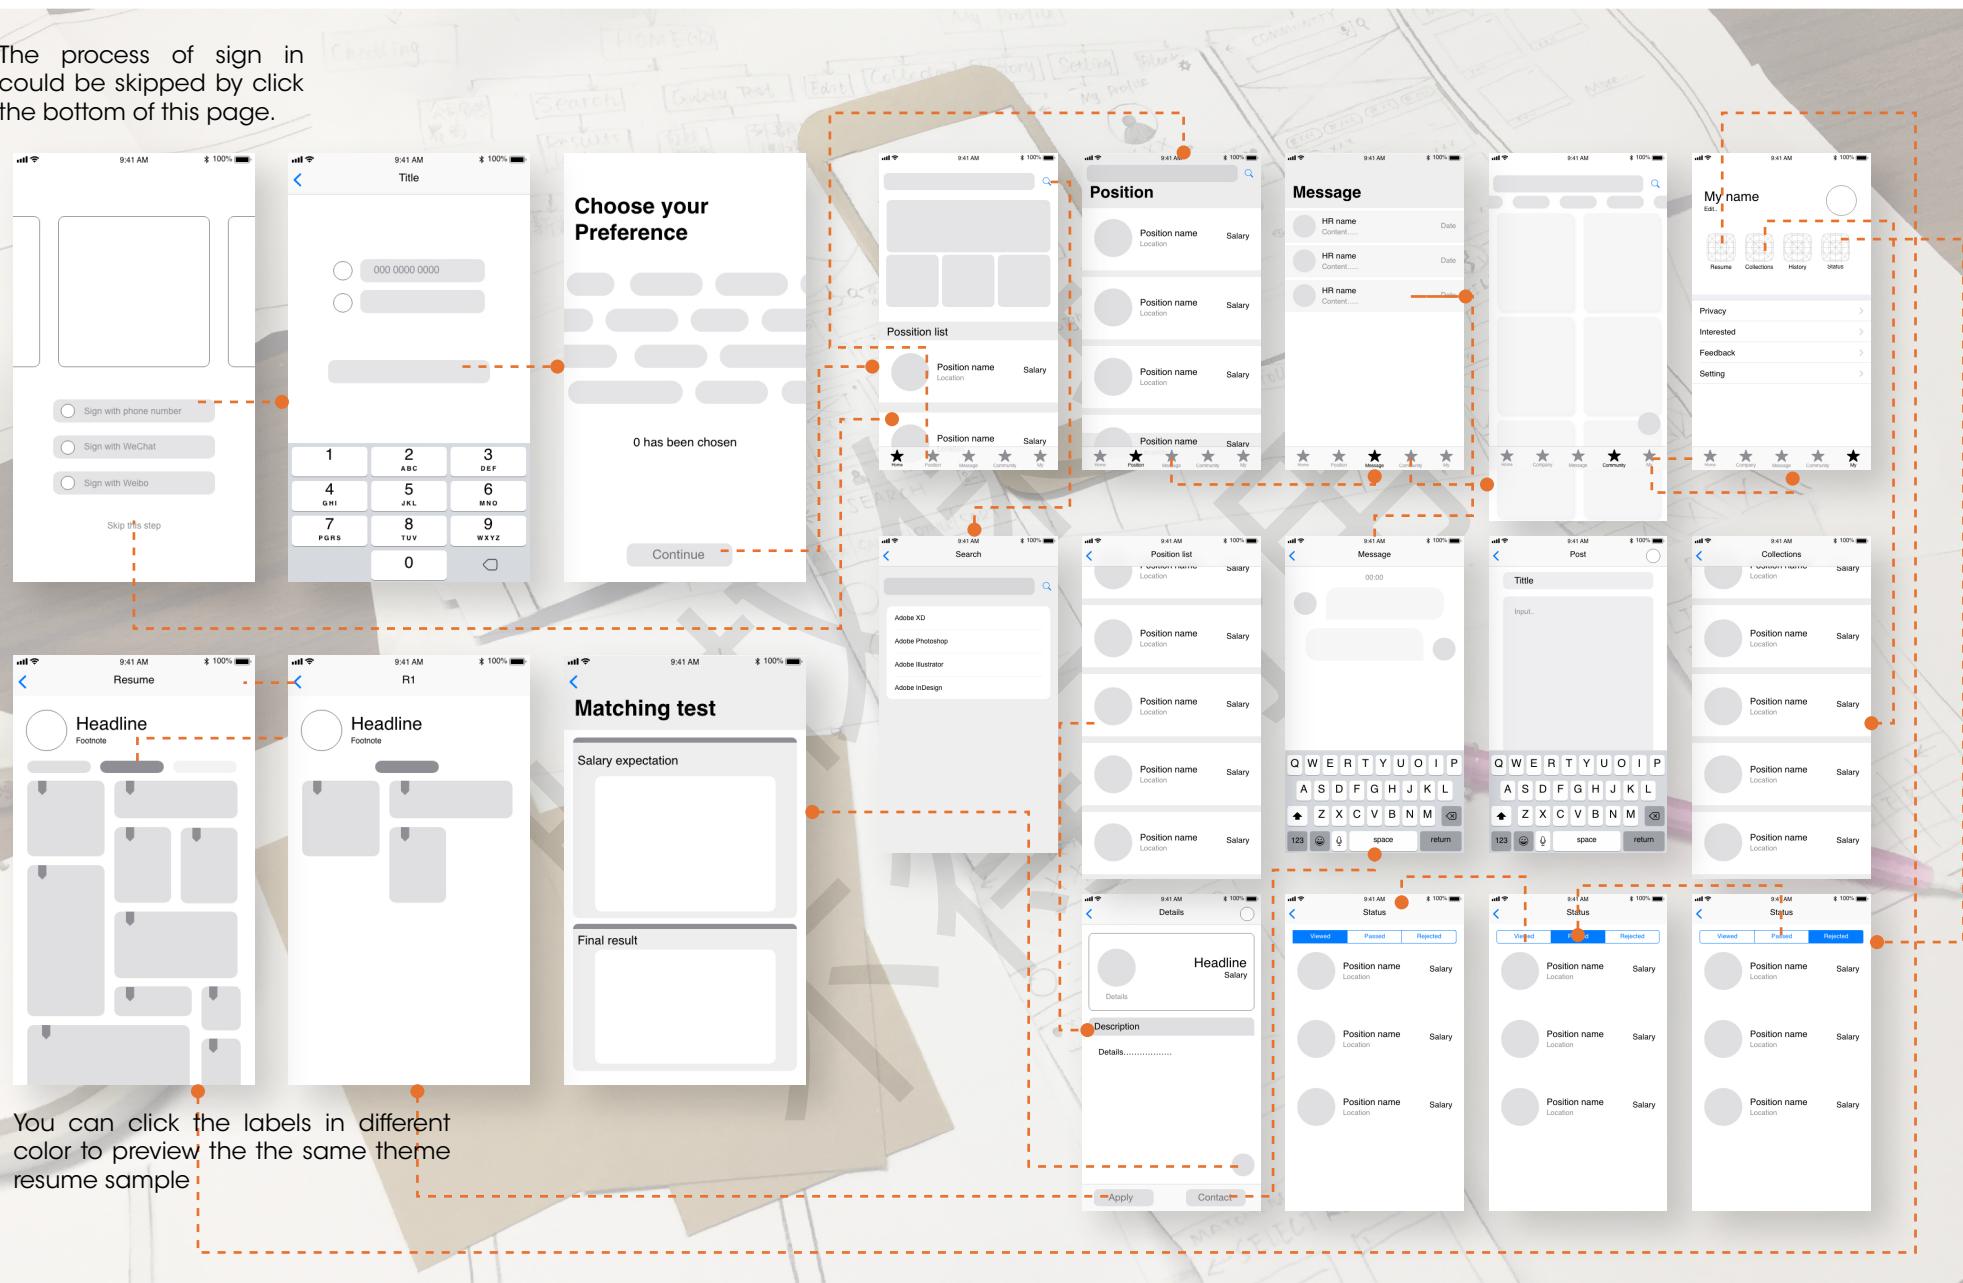

8. Now, Charles is working satisfactorily in his new working environment!

9. Within 2 years, Charles buys his dream car and marries to a nice lady!

The process of sign in could be skipped by click the bottom of this page.

TASK I: Explore The Home page

TASK 2: Explore The Community

TASK 3: Unlock resume filling

TASK 4: Understand matching test
